

Discussion Questions: Environment and AI (Week 12)

Before you watch anything for today — what did you assume about how much energy it takes to send a message to an AI chatbot? Where did that assumption come from?

Think about other digital activities you do: watching a YouTube video, sending a text, doing a Google search. How did you rank AI queries among those?

Next, we'll watch the video produced by Deutsche Welle (a German state-funded television network and public service international broadcaster funded by the Federal Government of Germany).

After the video, we'll pick two topics from the list of topics (attached) to discuss in small groups.
