---

Faculty and research positions:

2014 – present: Associate Professor, Department of Biology, Whitman College

2007 – 2014: Assistant Professor, Department of Biology, Whitman College

2006 – 2007: Visiting Assistant Professor, Department of Biology, Whitman College

2005 – 2006: Postdoctoral Research Fellow, Institute of Pharmacology, University of Heidelberg,  
Heidelberg, Germany

Research interests:

I am a neuroscientist interested in describing neural mechanisms underlying motor behavior and motor learning in order to improve treatment for those with motor deficits. I examine the control of eye and head movements of mammals as a model for understanding the mechanisms of sensorimotor integration, neural control and plasticity. To study these mechanisms, I use neuroanatomical histochemistry, *in vivo* electrophysiology in rodents, and noninvasive measurements of visuomotor behavior in humans (videoculography).

Education:

2005 **Ph.D., Neurobiology and Behavior**

University of Washington, Seattle, WA

*Dissertation: The role of the frontal eye field in coordinated eye-head gaze shifts in the rhesus monkey.*

Advisor: Dr. Albert F. Fuchs

- 2000 – 2003: University of Washington, Neuroscience Training Grant, GM-07108

1997 **M.S., Biology with Honors; Concentration: Physiology**

Eastern Michigan University, Ypsilanti, MI

*Thesis: The morphology of the urogenital region of the diandric, protogynous wrasse, *Thalassoma bifasciatum*.*

Advisor: Dr. Douglas Y. Shapiro

- Eastern Michigan University, Circle of Excellence Award (4.0 graduate GPA), 1997
- Eastern Michigan University, Hellwig Graduate Research Fellowship, 1994 – 1995
- Eastern Michigan University Dean's Award for Research Excellence, 2nd place, 1995

1989 **B.S., Biology Cum Laude**

Alma College, Alma, MI

- Alma College Trustee Honors Scholarship, 1985 – 1989
- State of Michigan Competitive Scholarship, 1985 – 1989
- Alma College Outstanding Senior Leader Award, 1989
- Alma College Campus Leadership Award, 1989
- Alma College Art Performance Scholarship, 1985 – 1987
- Alma College Department of Biology Scholarship, 1985 – 1986

### Teaching Experience:

- 2006 – present: Department of Biology, Whitman College:
  - Biol 111: Biological Principles (Spring 2007 – present);
  - Biol 111L: Biological Principles Laboratory (Spring 2007 – present);
  - Biol 228: Biostatistics (Spring 2008);
  - Biol 310: Physiology (Fall 2008);
  - Biol 310L: Physiology Laboratory (Fall 2008);
  - Biol 320: Neurobiology (Fall 2006);
  - Biol 320L: Neurobiology Laboratory (Fall 2006);
  - BIOL 323: Neurophysiology (Spring 2014);
  - BIOL 323L: Neurophysiology Laboratory (Spring 2014);
  - Biol 330: Human physiology (Spring 2010 – present (originally Pathophysiology));
  - Biol 330L: Human Physiology Laboratory (Spring 2010 – present);
  - Biol 471: Physiology and behavior of animals (Fall 2006);
  - Biol 471L: Physiology and behavior of animals Laboratory (Fall 2006);
  - Biol and BBMB 489, 490, 498: Senior Thesis Research (Fall 2006 – present)
- 1998: Graduate Teaching Assistant (with Drs. K. Mulligan and T. Reh), University of Washington School of Medicine:
  - HUBIO 532: Nervous System
- 1993 – 1994: Graduate Teaching Assistant (with Dr. H. Booth), Eastern Michigan University:
  - ZOO 200: Introduction to Zoology

### Research Experience:

- 2007 – present: Principal investigator/Lab co-director, Knight research laboratory at Whitman College. I investigate human motor control and movement coordination behavior with noninvasive videooculography and head measurement to determine rules of normal movement coordination, motor learning, and dysfunction associated with concussion. I also examine frontal cortex and midbrain involvement with eye and head movements in the mouse, developing this as a model for motor control studies. This involves stereotaxic injection of neuroanatomical tracers, histology, and electrophysiology (microstimulation, single neuron recording, and EMG recording).
- 2005 – 2006: Postdoctoral Research Fellow with Dr. R. Kuner, Institute of Pharmacology, University of Heidelberg. I used whole-cell patch clamp electrophysiology to examine plasticity at the primary nociceptor-spinal projection neuron synapse (in mouse spinal cord) as a possible mechanism of increased sensitivity to pain (hyperalgesia).
- 1999 – 2005: Ph.D. student/Research Assistant, dissertation research with Dr. A.F. Fuchs, University of Washington. I used extracellular single-unit recording and microstimulation of the frontal eye field (FEF) in the head-unrestrained monkey to demonstrate that FEF neurons encode gaze, eye, or head movements dependent on the position of the eyes before movement, suggesting a critical role for the FEF in eye-head movement coordination.
- 1996 – 1999: Ph.D. student/Research Assistant, dissertation research with Dr. E. Fetz, University of Washington. I used single-unit and cortical local field potential recordings (LFP) and microstimulation to investigate synchrony of neural activity within and between primary and supplementary motor regions in monkeys performing a bimanual manipulation task.
- 1993 – 1995: M.S. student/Research Assistant and Project Manager and with Dr. D.Y. Shapiro, Eastern Michigan University. I used field observation, gamete collection, histology,

light microscopy and scanning electron microscopy to investigate the effect of protogynous sex change on the reproductive anatomy of a coral reef fish. I also coordinated the efforts of the Shapiro lab in data collection and analysis, laboratory analyses, and histology.

Professional workshops and training:

- 2014: *Faculty for Undergraduate Neuroscience Summer Workshop*, workshop of neuroscience-focused faculty discussing concerns related to developing and sustaining undergraduate neuroscience programs, discussion of laboratory methods and teaching strategies, August 1-3, Ithaca College and Cornell University, Ithaca, NY.
- 2014: *Satellite pre-workshop laboratory seminar*, intensive neuroscience laboratory training sessions, July 31, 2014, Ithaca College and Cornell University, Ithaca, NY.
- 2013: *NW5C Ganglia meeting*, Workshop of Neuroscience-focused faculty (across Psychology, Biology, and Exercise Science departments), sharing objectives, methods and results of teaching strategies, Reed College, Portland, OR.
- 2011: *Brain, Behavior, and Mind*, Cross-Disciplinary Learning and Teaching Initiative Workshop, Whitman College
- 2005: Patch clamp methods training, Dr. H.U. Zeilhofer, Institute of Pharmacology and Toxicology, University of Zurich, Switzerland

Grant support:

- 2014: co-Principal Investigator, NSF RUI: *Investigation of insulin-based modulation of neural circuits and plasticity in the hippocampus*. Three-year grant for faculty research. Pre-proposal submitted 12/30/13; no full proposal invited.
- 2013 – 2014: Innovations In Teaching and Learning grant, Whitman College: *Strengthening Liberal Arts Education Through Interdisciplinary Quantitative Literacy and Reasoning*. Eleven faculty collaborators and I were awarded a \$16,440 grant to study, initiate and integrate quantitative reasoning assessment, curriculum, and assistance at Whitman College.
- 2013: Principal Investigator, NFL/GE Head Health Challenge, Phase I: *Development of a during-game diagnosis of mild traumatic brain injury and post-injury measures of recovery by noninvasive measurement and comparison of eye-head gaze shifts*; \$300,000, two-year grant for faculty research. Submitted 7/15/13; this application was not funded.
- 2012 – 2013: Innovations In Teaching and Learning grant, Whitman College: *Exploring Science at the Cutting Edge -- using electronic lab notebooks and innovations in technology to push biology teaching labs into the 21<sup>st</sup> century*. Two collaborators (Dr. Leena Knight, Assistant Professor of Biology, and David Sprunger, Director of Institutional Technology) and I were awarded a \$12,900 grant to introduce iPad and electronic lab notebook technology to integrate research and teaching.
- 2012: Principal Investigator, M.J. Murdock Charitable Trust Murdock College Research Program for Life Sciences: *Human eye-head coordination during gaze shifts in healthy subjects and those at risk for mild head injury and neurodegenerative movement disorders*; \$39,872 two-year renewal of 2010 – 2013 grant (below) for faculty research; this application was not funded.
- 2010 – 2012: Principal Investigator, M.J. Murdock Charitable Trust Murdock College Research Program for Life Sciences: *Human eye-head coordination during gaze shifts in the natural environment: effects of eye position, eye movement range, and behavioral context*;

\$66,000 two-year award for faculty research; funded for two years.

- 2012 – 2013: Abshire Research Scholar Award, Whitman College: *Eye-head coordination during gaze shifts in subjects at risk for mild head injury and neurodegenerative movement disorders*. \$2000 award for faculty research employing student researcher.
- 2012: Perry Summer Research Scholarship: *Human eye-head coordination during gaze shifts in the natural environment: effects of eye position and eye movement range*; \$8000 Whitman College award for student-faculty research.
- 2009: Perry Summer Research Scholarship: *Neural control of eye and head movements in the mouse: functional connections between eye and head premotor regions*; \$8000 Whitman College award for student-faculty research.
- 2008: Perry Summer Research Scholarship: *Control of orienting head movements in the mouse: projections from the motor cortex to brainstem neck premotor regions*; \$8000 Whitman College award for student-faculty research.
- 2000 – 2003: University of Washington, Neuroscience Training Grant, GM-07108.

Publications:

**Knight, T.A.** and Shapiro, D.Y. *in revision*. The morphology of the urogenital region of the Bluehead wrasse, *Thalassoma bifasciatum*: female egg release via epidermal rupture. *Copeia*.

#### Collaborations:

Dr. Leena Knight, Ph.D., Whitman College Department of Biology — laboratory co-director and collaborator on rodent neuroanatomical, electrophysiological (insulin-effects), behavioral and neurological disorder (Post-traumatic stress disorder, PTSD; Parkinson’s disease) studies.

Dr. James Phillips, Ph.D., Director of the University of Washington Medical Center Dizziness and Balance Center, and Seattle Children’s Hospital — collaborator on human gaze project, with laboratory and equipment sharing, analyses, programming support, and clinical patient investigations.

Dr. Patricia Szot, Ph.D., UW Dept. of Psychiatry and Behavioral Science and the Veterans Administration Puget Sound Health Care System — collaborator on rodent neuroanatomical, electrophysiological, and disorder studies.

Dr. Erich Schneider, Ph.D., Ludwigs-Maximilian University’s Institute of Clinical Neuroscience in Munich, Germany — team leader developing EyeSeeCam, portable videooculography equipment and software for human visuomotor research.

#### Memberships in professional/academic societies:

- 2010 – present: Faculty for Undergraduate Neuroscience (FUN), member
- 2008 – present: Sigma Xi, member
- 2004 – present: American Physiological Society, member
- 1998 – present: Society for Neuroscience, member
- 1997 – 1998: American Society of Ichthyologists and Herpetologists, member
- 1989 – present: Omicron Delta Kappa, member

#### Peer Review Activity:

- Peer reviewer for *Frontiers in Neuroscience*

#### Service commitments:

- 2014 – present: Member, Whitman College Sustainability Task Force.
- 2008 – present: Member, Whitman College Premedical Advisory Committee.
- 2008 – present: Supervisor, Whitman College Biology Department’s Virtual Pig Dissection website — I coordinated the effort to complete the first revision of Whitman’s enormously popular website, completed in 2011.
- 2009 – present: Biology Department overseer of Physiology and Introductory Biology laboratory teaching spaces renovation.

- 2008 – 2013: Faculty Advisor, Sigma Chi Fraternity, Whitman College chapter.
- 2010 – 2011: Chair, Whitman College General Studies Committee — oversight of general studies (First year course, Cultural Pluralism requirement, distributions) programming (learning objectives, requirements, assessments, coordination).
- 2011: Participant, the Mellon NW5C Roundtable on Best Pedagogical Practices, hosted by Reed College, January 21-22, 2011.
- 2007 – 2011: Member, Whitman College General Studies Committee.
- 2008 – 2010: Co-director, Murdock Trust’s College Science Research Program, Whitman College.
