Day 1: Calculus Lab

Goals for today's lab:

- Syllabus

- Be able to log in and out (and in again).

- Know how to change your password:

  In a shell window, type: `kpasswd`

  The first password asked for is your current password.

- Customize the desktop with Maple, Firefox (bookmark our class website), and a Terminal Window.

  Find the desired icon under either `Applications` or `Actions`, then use the mouse to drag it to the toolbar.

  Use Firefox to get to our class website, and bookmark it.

- Using a shell (or terminal window, or command line interface), be able to (i) make directories, (ii) navigate through them, (iii) list the contents of a directory.

  Go through the example attached.

- Introduction to LaTeX (the Mathematics word processing software). Work through "Homework Day 1".
