

HOMEWORK: Group Work Assessment

10 points

Part of this course is to learn to work in groups. As such, part of your grade will be an assessment from your previous lab partners as to how well you did.

Each of you are to send an email to me listing your previous lab partners, and assign each of them a number from 0 (low) to 3 (high)- As a reminder, the groups are listed below.

The number should reflect how it was to work with that person and you will recall some “characteristics of a good lab partner” that we discussed earlier (feel free to add more):

- Arrive on time.
- Ready to go when they do arrive.
- Ready to help, willing to do their fair share of the workload.
- Willing to schedule off-hour meetings.

I will keep your individual assessments confidential- Each student will see only the average score, but of course you are welcome to stop by my office and discuss your score. The overall score will count as 10 points.

Deadline: Before our next (last) class meeting.
