Grading Criteria, Biorhythms Lab:

The lab is worth 12 points total. Each member of each group will upload the documents with their personalized biorhythm plot (therefore, each of you ought to be uploading something).

The deadline for uploading the PDF and tex files to CLEo is **Monday, Feb 23d, 10PM**.

- Include the names of all lab partners on the write up.

- Format should include sections and enumerated lists. Also, be sure to look over the "writing tips" on the last page of the lab.

- The solutions should be complete, and written in complete sentences.

- Include at least one figure from Maple, and a reference to it in the text (using `\label` and `\ref`).

- LaTeX typesetting follows our guidelines thus far. That is, use sizeable parentheses and typeset functions using a "slash". Use inline and display mathematics correctly, etc.

- Solutions should be mathematically correct.

- Give each partner a "grade" of $+$ or $-$. A $+$ sign means that you were able to work together and your partner was helpful. A $-$ sign means that the partner was missing a good deal, or was not as helpful as he/she might have been.
