

# Math 367 Homework Set 1

## Problem Set 1: Assigned Week 1, Turned in Week 2

I'll let you know in class which sections we're working in. You should only do the problems for that section (you can work ahead if you would like!).

For the problems that are turned in, your solutions should be **neatly and completely** written out. I will deduct points if your work is sloppy or hard to read! You should include enough detail so that you can pick up the solution page without the textbook and understand the question, and reproduce the answer.

Finally, be sure that you're working through the homework on the day that we cover that section- Do NOT wait until the last minute, because you should take that time to be studying for the upcoming quiz.
