

# Author's Revision Roadmap

Project Title: \_\_\_\_\_

Reviewer(s): \_\_\_\_\_

## 1. The "Top Three" Synthesis

After reading through your peer's comments, don't look at the details yet. Identify the three most significant "big picture" themes they raised.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

## 2. Feedback Action Matrix

How would you classify the feedback, and what plans do you have for it?

The Feedback	Action Level	My Plan / Reasoning
e.g., <i>"The intro is too technical."</i>	<b>Critical</b>	Rewrite the first 3 paragraphs using the "layman" definitions.
e.g., <i>"Add a chart for Table 2."</i>	<b>Enhancement</b>	Create a bar graph if time permits after the rewrite.
e.g., <i>"Change the tone to be funnier."</i>	<b>Discard</b>	The project is a formal medical study; humor isn't appropriate here.

Your goal here is to create a record of your editorial choices (a good skill to have when you need to defend a final project to a committee or your boss).
