ORCID: 0000-0003-1109-6418

EDUCATION

Ph.D., Chemistry, University of California, Riverside, 2005

Dissertation: "Carborane Anions in Superacidity and the Stabilization of Reactive Cations"

Advisor: Dr. Christopher A. Reed

M.S., Chemistry, University of California, Riverside, 2001

B.A., Chemistry (ACS Certified, Minor: Physics), *Cum Laude, Honors in Chemistry*,
Wittenberg University, 2000

PROFESSIONAL EXPERIENCE

Current Position: Associate Professor of Chemistry, Whitman College, 2015 - present

Assistant Professor of Chemistry, Whitman College, 2009 - 2015

Visiting Assistant Professor of Chemistry, Allegheny College, 2007 – 2009

Faculty Fellow and Visiting Assistant Professor of Chemistry, Colby College, 2005 – 2007

HONORS AND AWARDS

A. E. Lange Award for Distinguished Science Teaching, Whitman College, 2015

Demmler Award for Teaching Innovation, Allegheny College, 2008

Outstanding Teaching Assistant, University of California, Riverside, 2001

Chancellor's Distinguished Fellowship, University of California, Riverside, 2000

James T. Gregory Award for Potential in Chemistry Research, Wittenberg University, 2000

Outstanding Organic Chemistry Student Award, Wittenberg University, 1998

University Scholar (highest academic scholarship; Wittenberg University), 1996 – 2000

National Merit Scholarship, 1996

COURSES TAUGHT/DEVELOPED

Organic Chemistry I and II: Sophomore level lecture course

Organic Lab Techniques I and II: Sophomore level laboratory course

General Chemistry: First year introductory course, lecture and laboratory

Advanced Methods in Inorganic and Organic Synthesis and Characterization: Upper level laboratory course focusing on synthetic techniques, multi-step synthesis, organometallic chemistry, handling of air-sensitive materials, and 1d and 2d NMR spectroscopy.

Physical Organic Chemistry: A course for upper level students that explores advanced topics in organic chemistry. The course explores a number of molecules that challenge conventional

Revised July 14, 2023

limits of bonding, structure, and stability. Other topics include aromaticity, methods for studying reaction mechanisms, reaction intermediates, and computational modeling. A significant portion of the course is based on articles from professional chemistry journals.

Chemistry Seminar: A course for upper level students featuring a visiting speaker series, discussions of current topics in chemistry, and professional development workshops. Presenters include alumni and other chemists from academia, industry, and government labs.

RESEARCH INTERESTS

My research explores molecules built from clusters of boron atoms, known as boranes, and clusters that contain a mix of boron and carbon, known as carboranes. Many applications of these molecules have been predicted, but their use is currently limited because few methods exist for preparing carborane- and borane-based molecules. My research program aims to develop synthetic methods for preparing new borane and carborane-based molecules. Past and ongoing investigations in my lab include cross-coupling reactions of carboranes, an efficient iodination method for boron clusters, and the use of microwave irradiation for preparing new boron clusters. This work employs organic and inorganic synthetic chemistry techniques and is ideal for collaborative research with undergraduate students.

Before coming to Whitman, I worked on the synthesis of the world's strongest acid (over a billion billion times stronger than sulfuric acid) and the development of an NMR spectroscopy-based method for measuring the strength of extremely strong acids. I also studied carbocations, fleeting intermediates in organic chemistry reactions, and isolated the first crystals of a vinyl carbocation—a molecule that had eluded chemists for over 50 years.

UNDERGRADUATE RESEARCH ADVISING

Whitman College, 2009 – present

Collaborative research with twenty-three students on the synthesis of new boron clusters.

Allegheny College, 2007-2009

Collaborative work with two students on synthesis of new derivatives of the $CB_{11}H_{12}^-$ anion.

Colby College, 2006 - 2007

Collaborative work with two students on synthesis of new derivatives of the $CB_{11}H_{12}^-$ anion.

University of California, Riverside, 2000 – 2005

Mentored three undergraduate students on the synthesis of carboranes .

INVITED LECTURES AND NON-CONFERENCE PRESENTATIONS

“New Synthetic Chemistry for Boron Clusters,” Juhasz, M. A., University of Idaho Chemistry Department Seminar, March 3, 2015.

“The Story of B: New Chemistry with Polyhedral Boron Clusters,” Juhasz, M. A., Whitman College Faculty Forum, December 3, 2014.

“The B Next Door: Developing New Chemistry with Clusters of Element 5,” Juhasz, M. A., Whitman College Chemistry Department Seminar, September 19, 2014.

“Boron Clusters for Medicine, Materials, and Catalysts: Synthesis and Reactivity of New CB11-based Molecules,” Juhasz, M. A., Eastern Washington University Chemistry Department Seminar, February 13, 2014.

“The Chemistry of Food,” Juhasz, M. A., HHMI-Whitman College Science Outreach Program, January 29, 2011.

GRANTS AND FUNDING

National Science Foundation—Research At Undergraduate Institutions Grant, 2018 – 2022
PI, “RUI: New Synthetic Methods for CB11 Carboranes,” \$240,000 over 3 years, includes a one-year no-cost extension of funding

Arnold and Mabel Beckman Foundation—Beckman Scholars Program, 2019-2021
Co-PI, \$104,000 over 3 years

Whitman College Perry Research Award, 2016
PI, “New Synthetic Methods for CB11-Based Boron Clusters,” \$8500

Murdock College Research Program for Natural Sciences, 2015 – 2019

PI, "New synthetic methodologies for CB_{11} , CB_9 and C_2B_{10} carboranes," \$72,000 over 3 years

Whitman College Perry Research Award, 2013

PI, "Boron clusters for drugs and advanced materials: new derivatives of 1-carba-closo-dodecaborate(1-)," \$8500

Whitman College Perry Research Award, 2012

PI, "Development of cyanation methods for 1-carba-closo-dodecaborate(1-)," \$8500

Whitman College Perry Research Award, 2011

PI, "Microwave-Initiated Kumada Coupling Reactions of the 1-Carba-closo-dodecaborate(1-) Anion," \$8500

National Science Foundation—Major Research Instrumentation Grant, 2009 – 2012

Co-PI, "MRI: Acquisition of a 400 MHz NMR Spectrometer for Undergraduate Research and Research Training," \$389,000 over 3 years

M.J. Murdock Charitable Trust Start-up Grant, 2009 – 2011

PI, \$25,000 over 2 years

Demmler Award for Teaching Innovation, Allegheny College, 2008

PI, "Developing Investigative Computer-Based Modeling Activities for Organic Chemistry," \$6000 grant awarded to support the development of chemistry modeling exercises

PROFESSIONAL SOCIETY MEMBERSHIPS AND RECENT PROFESSIONAL SERVICE

American Chemical Society (ACS), 2001 – present

Council on Undergraduate Research (CUR), 2009 – present

Sigma Xi: The Scientific Research Society, 2014 – 2017

Article reviewer for *Inorganic Chemistry*, *Organometallics*, *European Journal of Organic Chemistry*, *Tetrahedron Letters*, *Journal of Chemical Education*, *The Chemical Educator*

Grant proposal reviewer for National Science Foundation proposals

External reviewer for tenure/promotion at peer institutions

RECENT ACADEMIC SERVICE (SINCE FALL 2014)

Chemistry Department Chair, 2018 – 2019, 2020 – 2021, 2022 – 2023

New Faculty Mentor, 2020 – 2021

Beckman Scholars Program Committee, 2018 – 2022

Faculty Personnel Committee, 2015 – 2018 (Chair for 2017 – 2018)

Center for Teaching and Learning Steering Committee, Spring 2016

Presidential Installation Committee, 2015

ASID Committee, 2014 – 2015

Chemistry Department Webmaster, 2016 – 2017

Assessment Committee, 2014 – 2015

Goldwater Scholarship Committee, Campus Representative 2014 – 2016, 2020 – 2022

Chemistry Faculty Search Committees (2 Tenure Track, 5 Visiting), 2014 – 2021

RECENT COMMUNITY OUTREACH AND NONACADEMIC SERVICE

Whitman College Cycling Team Faculty Adviser, 2009 – 2018

Tour of Walla Walla Planning Committee, 2010 – present

Walla Walla 2020, Energy and Sustainability subcommittee, 2015

Whitman College International Student Friendship Family, 2013 – 2018

Whitman College Service Saturdays: Volunteer, 2014 – 2015

ADDITIONAL SKILLS AND INTERESTS

Synthetic Organic and Inorganic Chemistry skills, with extensive experience handling highly reactive air- and moisture-sensitive compounds using a glovebox and Schlenk techniques. Experienced in microwave-assisted synthesis.

Extensive experience with installation and maintenance of computers running chemistry software on Windows, Macintosh, and Linux platforms. Experience with various chemistry modeling and visualization software packages, including Gaussian, Spartan, GAMESS, ChemOffice, ChemDoodle, WebMO, PCModel, Pymol, and JMol.

Experience with a variety of chemistry instrumentation. Instruments and techniques specifically used in research and teaching have included multinuclear 1d and 2d NMR, X-ray crystallography, FTIR, GC, GC-MS, HPLC, ICP-AES, MALDI-TOF MS, LC-MS, and TGA, as well as a number of benchtop probes interfaced to computers using Vernier data acquisition software.
