
There will be three components to the course grade: homework, two exams in class (early October and early November), and a final exam. The weights of these items in determining your course grade are:

- homework 40%
- exams 20% each
- final 20%

The final will be comprehensive. Homework will be due weekly. I will collect homework and grade some, but perhaps not all, of the problems. The problems will be graded for neatness, clarity and completeness as well as correctness: if I have trouble reading or understanding a solution, you will get little or no credit. Explain your work; use complete sentences.
